

Inspiring Environmental Stewardship

Eco Arts Incursions

The Eco Arts Culture Hub of the Phillip Island Conservation Society (PICS), supported by a grant from the Bass Coast Shire Council, is presenting *For Our Future*, an environmental program of Eco Arts events and activities. The program brings together the Arts, Science and Culture and is intercultural, intergenerational and interdisciplinary. *For Our Future* is designed to inspire environmental stewardship, deepening a sense of connection with each other and the Living World.

For Our Future is offering community activities and an educational stream of Eco Arts activities and events in schools and the community. Members of an interdisciplinary team comprised of artists, musicians, conservationists and First Nation cultural educators are available to facilitate environmentally focussed activities and learning experiences. All activities are an invitation to listen more deeply and respectfully to the Living World and to recognise ourselves as part of it.

For Our Future 2022-2023 is structured around four projects, Country is Listening, Living Water Ways, Ocean Messages and an Eco Arts Community Celebration at the new Cowes Cultural and Community Centre. The projects will be led by artists supported by interdisciplinary teams of Eco Arts Collaborators.

Events and activities in *For Our Future* align with the Australian Curriculum 9.0 with a focus on:

1) Learning Areas

- The Arts
- Science
- Humanities and Social Sciences

2) General Capabilities

- Intercultural Understanding
- Literacy
- Personal and Social Capability

3) Cross-curriculum Priorities

- Sustainability
- Aboriginal and Torres Strait Islander Histories and Cultures.

For Our Future is designed to facilitate learning with participants of all ages, backgrounds and abilities. The program of events and activities can be adapted for groups of different sizes.

Schools and Community Groups interested in engaging in Eco Arts collaborations can contact ...

Alignment with Australian Educational Curriculum

General Capabilities in the Australian Curriculum are addressed through the content of the Learning Areas. Students develop capability when they apply and skills confidently, effectively and appropriately in complex and changing circumstances, in their learning at school and in their lives outside school.

Intercultural Understanding Elements

Literacy Elements

Personal and Social Capability Elements

Cross-curriculum priorities are addressed through learning areas and offer opportunities to add depth and richness to student learning. Learning area content that draws on cross-curriculum priorities and the general capabilities at the same time provide very rich learning experiences for students.

Sustainability

Aboriginal and Torres Strait Islander Histories and Cultures
